Costly
Difficult to integrate
Slow
Un-flexible
Heavy

VS.

Inexpensive
Easy to integrate
Fast
Flexible and lightweight
More functionalities

The usage of modern devices not only saves money (approx 60% per user), it also increases productivity and reduces the time to learn use PULPO.

Screenshots: Sales Orders & Split Picking

Intuitive interface and functional design with the user in mind. This interface is also reflected across the whole platform: Keeping it easy to use!

Screenshot: Mobile App

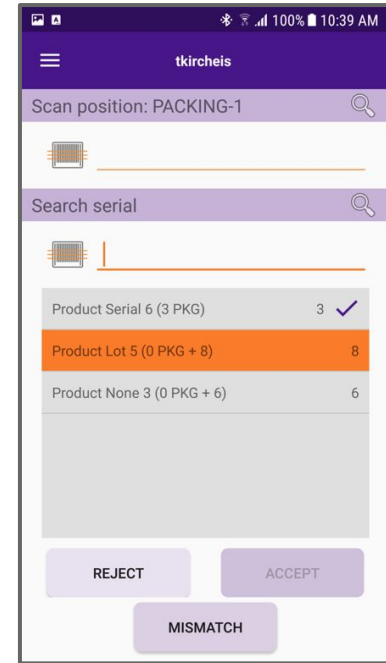

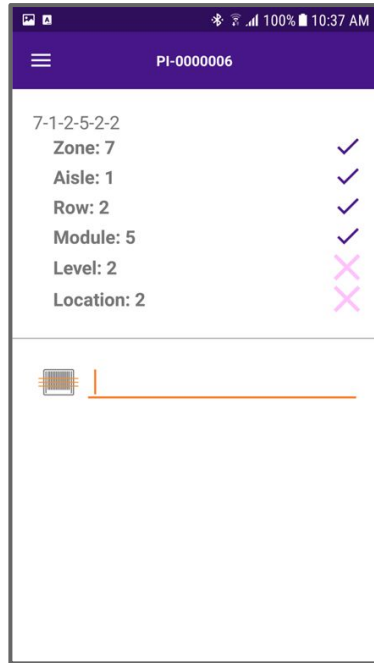

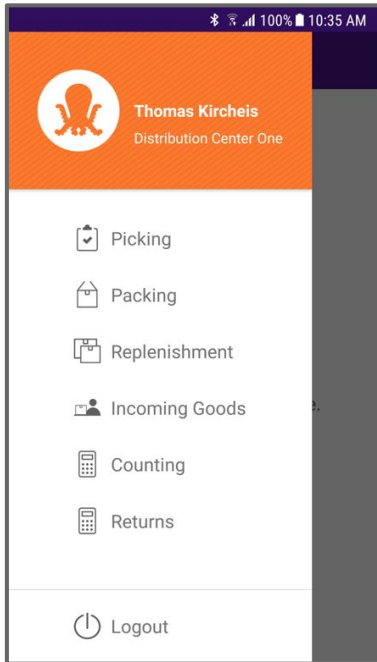

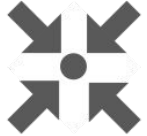

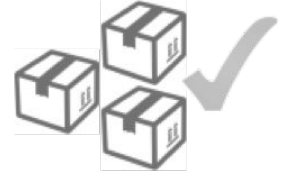

The use of a native Android App not only makes PULPO very fast, it also allows us to focus on showing only what's necessary for the user.

Advantages of using PULPO WMS

Reduce warehousing costs

Increase accuracy of stock

Improve the usage of space

Decrease dispatch errors

Eliminate manual tasks

Improve client happiness through improved speed & quality of all processes

Increase staff productivity

Reduce time & costs to train warehouse staff

PULPO WMS can help you save more than 50% of your internal logistic costs

Implementation of PULPO WMS

1) Add the warehouse to PULPO WMS (if needed: connect ERP)

2) Upload the products into PULPO WMS

3) Define user roles and responsibilities

4) Testing

5) Start off with doing a full inventory and GO-Live

Our goal is to have PULPO WMS running in your company in only 1 month!
